Communication

Date	25 October 2026
Team ID	EN25CS3011092
Project Name	Global Olympic Sports Performance Analysis Dashboard (Tableau)
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Personal to-do list / Notes app	Individual (Self)	Plan daily tasks: data validation, worksheets, dashboard building and publishing
2	Progress Update	Weekly	Email / Google Meet	Individual, Mentor	Share completed worksheets and dashboard progress for guidance
3	Issue / Bug Discussion	As Needed	Tableau Community, Online Docs	Individual (Self)	Troubleshoot relationship, calculated field, filter and layout issues
4	Stakeholder Review	Bi-Weekly	Google Meet / Screen Share	Individual, Mentor / Evaluator	Review both dashboards against the 3 stakeholder scenarios
5	Final Demo Rehearsal	Once	Screen recording / Tableau Public	Individual (Self)	Practice demo flow, timing, filters and the story
6	Mentor Feedback Session	As Scheduled	Email / Google Meet	Individual, Mentor	Collect feedback and apply improvements to visuals

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Working alone, so there was no teammate to review the dashboards or catch errors.	Used a self-review checklist, tested every filter, parameter and tooltip, and took mentor feedback.
2	The athletes dataset has no year column, so the Year filter cannot change the athlete-based charts.	Related the athletes table to the other tables on noc_code only, and documented which filters apply to which charts.
3	Dashboards and the story looked squeezed and cut off after publishing because their size was set to Automatic.	Set both dashboards to a fixed size, gave the story a larger custom size, and re-published to check every scene.
4	Making sure the dashboards answered the needs of all 3 stakeholder scenarios.	Mapped each KPI and chart to Michael, Sofia and Dr. Aisha's goals and built 2 focused dashboards.
